TOPBACKUP CLOUD CONNECT

EFFICIENT TRANSFER OF BACKUPS TO CONOVA

Transfer backups of physical and virtual systems with an end-to-end encryption to external storage locations without the cost and complexity of developing and maintaining an external infrastructure. Control is done centrally via the existing veeam backup infrastructure. Make the most of modern backup technology with backup copy jobs and integrated WAN acceleration, unlimited incremental backups, GFS storage guidelines (grandfather-father-son), and more.

Highlights at a glance

- Transfer of virtual and physical backups to an external location
- Highest data security in one of the most modern data centers in Europe
- Fully integrated with existing backup technology from veeam software
- Restore entire VMs, VM files, and hard drives with just a few clicks
- End-to-end encryption of your backups
- Scalable use of backup capacity in the data center
- Integrated WAN accelerator for efficient transfer of backups
- Complete transparency and control
