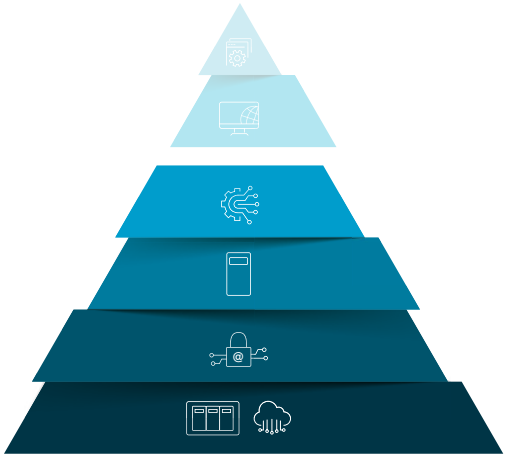
TOPCONTAINER

THE PLATFORM-AS-A-SERVICE SOLUTION FOR CONTAINERS AND ORCHESTRATION.

With TopContainer, conova provides you with one of the most modern Red Hat®OpenShift® managed platforms as a platform-as-a-service solution in which you can easily manage and operate your containers. The guaranteed provision of resources that can be scaled at any time in our highly-available data centers as well as the permanent availability of the redundant OpenShift environment is included as well.

Highlights at a glance

- Container orchestration managed and maintained by conova
- Based on RedHat OpenShift 4
- Automatic container scaling
- Highly available resources in Austrian data centers
- Integrated load balancer for HTTP and HTTPS, additional TCP ports possible*
- Simple integration of the conova portfolio (TopFirewall required)
- Wide range of storage options available from conova
- conova is a certified Red Hat cloud and service provider



TopContainer – Basic	Set-up costs (one-time expense)	price per month
Provision of the basic infrastructure (control plane, container infrastructure and load balancer)	EUR 1,500.00	EUR 500.00
TopContainer instance including Red Hat license – at least 1 instance required [1] (12 GHz computing power, 24 GB RAM, 100GB primary storage)	EUR 400.00	EUR 600.00
TopContainer – extensions (excerpt)		
Performance Pack (48 GB RAM, 12 GHz computing power) including Red Hat license (from 24 GB RAM possible)	--	EUR 499.00
Additional computing power for TopContainer instance (4vCores, corresponds to 12 GHz computing power) including Red Hat license	--	EUR 400.00
primary storage 100 GB	--	EUR 19,00

*UDP and other individual solutions are possible. Please contact our sales team for more information.

[1] For productive environments, we recommend using at least 2 TopContainer instances. These can be distributed to different data centers.

Note:

- Billing is based on allocated resources in the form of computing power, working memory and storage capacities as well as a provision fee for the platform. This offers you 24/7 operation of the RedHat OpenShift platform and conova guarantees both the availability of the API as well as the resources.
