# TOPMAIL SV

PREMIUM SPAM AND VIRUS PROTECTION SOLUTION – MANAGED BY CONOVA

No hardware, software or administrative effort needed: conova's spam filter service provides companies with an optimal solution to protect against spam, viruses and malware – from both a technical and economical point of view. A user-friendly web interface and an automatically generated user spam report keep you up to date.

" Highlights at a glance

- Highest spam and virus recognition rates on the market
- E-mails are cached in case of E-mail infrastructure failure
- Extensive E-mail statistics and live tracking via web interface
- Highest compliance, transparency and control
- Simple central management with 24/7 monitoring
- No costly investment in own infrastructure required
- Customer has no need to install hardware and software
- Optionally combinable with TopMail ATP, TopMail Archive and TopMail Crypt

The spam filter service offers the highest detection rates available on the market with a guaranteed detection rate of 99.9 % and a virus detection rate of 99.99 %. It protects mail servers from DDoS attacks and users from phishing E-mails. conova's multi-level filtering systems block the majority of spam E-mails as they arrive – keeping the quarantine clear and easily manageable.
