

TOPDEFENSE®

HIGHEST POSSIBLE PROTECTION AGAINST VOLUME-BASED DDOS ATTACKS

Permanent availability of Internet access is essential for the success of many businesses. However, many are increasingly subject to volume-based denial-of-service attacks, which can result in delayed data delivery or server timeouts – and thereby result in lost revenue or damaged reputations. TopDefense® is a multi-level defense system and protects the customer's entire infrastructure in the conova data centers – managed by conova.

” Highlights at a glance

- Maximum protection against attacks to business-critical applications such as web services and VPN endpoints
- TopDefense® Basic is free to all conova customers
- Offers active protective measures such as blackholing, filter listing, rate limits
- Fully automatic analysis and defense against anomalies in the scrubbing nodes using defined filter criteria
- 24/7 operation and support by certified conova specialists
- No costly investments in your own infrastructure required
