

TOPAWARENESS

COMPREHENSIVE AND SUSTAINABLE SECURITY TRAINING FOR YOUR EMPLOYEES

Cyber-attacks aim to find and exploit technical or human vulnerabilities. With effective security awareness training, you can protect your employees from cyber-attacks and raise awareness while strengthening the human firewall in your company. Realistic, fully automated, spear-phishing simulations and AI-supported e-trainings are used. An individual awareness dashboard enables you to view the development of the training courses at any time, while also allowing you to adapt them to your company's needs.

Highlights at a glance

- Spear-Phishing attacks with various levels of difficulty
- Fully-automated and easy to use
- Employee security index provides information related to the security level
- Booster option available for users who require further training
- Dashboard provides an overview of training success
- Interactive learning modules and entertaining e-learning courses
- Possible automatic onboarding for new users
- Available for Microsoft 365, dedicated mail server and hosted exchange ¹⁾

TopAwareness	Setup-costs (one-time expense)	price per user per month
from 5 - 249 Users	upon request	upon request
250+ Users	upon request	upon request

¹⁾ There are limitations in the reporting and statistical options when using dedicated mail servers or other forms of hosted exchange.

Notes:

- Monthly billing is based on the number of users created in the system or analogous to Microsoft 365 (Microsoft 365 mailbox with activated Exchange functionality).
- An AD-connection is required for automatic user management starting from more than 49 users.

Further Managed Security Services can be found in our current price list.
