

TOPMAIL MICROSOFT 365 PROTECTION

YOUR SECURITY, COMPLIANCE & BACKUP MANAGEMENT FOR MICROSOFT 365

By combining premium spam and virus protection with advanced threat protection, including sandboxing, you protect your IT against highly complex attacks. Further, you also have the option to enable 100% encrypted email communication with your correspondence partners – a prerequisite for GDPR compliance in certain sectors. In addition, an automated backup and recovery solution specifically designed for Microsoft 365 mailboxes provides extra protection by securing your data at an external storage location.

Highlights at a glance

- Award-winning spam and virus protection with content control
- Advanced threat protection and sandboxing
- Business continuity ensured through continuous availability of an email archive
- Revision-compliant email archiving
- Simple, fully integrated encryption solution
- URL Malware Control and email live tracking
- Unlimited backup storage included
- Granular restoration of files and individual items

Incoming as well as outgoing emails are scanned, and – if desired – encrypted and archived using our TopMail Microsoft 365 Protection solution. A compliance filter with predefined rules and advanced Extended Allow and Deny List functions give you granular control over your incoming and outgoing email traffic. Using an additional backup, you can protect your company against data loss. Backups are performed multiple times a day and stored as immutable backups with modern AES-256 encryption.
