CONSULTING

TECHNICAL EXCELLENCE MEETS STRATEGIC GUIDANCE

When choosing the right setup or solution, our experienced conova specialists provide comprehensive guidance – from strategic planning to technical implementation, and for all inquiries relating to infrastructure, security and performance. Together, we develop an IT strategy that optimally supports your business processes and makes your systems secure, high-performing, and future-oriented. We also do not rely on a fixed architecture – instead, we focus on the intelligent combination of managed hosting in our data centers, on-site solutions at your location as well as public cloud services.

" You benefit from

- Our long-standing experience in 24/7 operations of complex IT infrastructures
- A comprehensive approach: from hardware infrastructure and security to virtualization, applications and managed services
- Our tailored consulting and customized solutions
- Your dedicated contact person
- A comprehensive evaluation by our certified specialists
- The ideal mix of on-premises, hosted, public cloud, and hybrid setups

INFRASTRUCTURE & DATA CENTER CONSULTING

- Decades of experience in operating geo-redundant data centers
- Efficient IT architectures through the combination of data centers, on-premises environments, and public cloud services

MANAGED SERVER & CONTAINER TECHNOLOGIES

- Optimization of Windows and Linux servers with regard to performance, scalability, and security
- Implementation of OpenShift infrastructures, container technologies and Kubernetes

NETWORKS & SECURITY

- Holistic security concepts
- Analysis of existing networks as well as planning and implementation of new components
- Routing, Switching, WLAN, Firewalls and VPNs
- Comprehensive email security, including spam and virus protection, compliance-ready archiving, and reliable backups

DATABASES & APPLICATIONS

- Infrastructure consulting and DBA support – for PostgreSQL, Microsoft SQL and MySQL
- Support and consulting for the secure and efficient use of Microsoft 365
- Secure design and configuration of your tenants

PERFORMANCE & AVAILABILITY

- Analysis of your performance, including optimization recommendations with a focus on high availability and efficiency
- Optimal load distribution using load balancers
- Monitoring of central systems within a unified interface

AUTOMATION & INFRACTRUCTURE AS CODE (IAC)

- Automation and standardization of your infrastructure with modern Infrastructure as Code (IaC) approaches

We continuously expand our portfolio – please contact us if you require support in a specific area.
