

TOPSERVER MANAGED VM

HIGH QUALITY AND INDIVIDUAL VIRTUAL SERVER FOR YOUR BUSINESS

Highest failure safety, performance and low investment costs are only three of the many advantages of virtual server managed by conova. The infrastructure is adapted to suit your needs and thus forms the ideal basis for mission-critical applications. Our certified Microsoft and Open Technology specialists take over everyday operations including the operating system and selected standard applications. Security patching, proactive 24/7 monitoring and backup included.

Highlights at a glance

- Managed server based on a Microsoft or Linux operating system
- Guaranteed allocation of virtual resources
- Highest performance, security and scalability
- Use of current technologies in servers/storage/network
- Data remains exclusively in our Austrian data centers
- 24/7 operation and support from certified specialists
- Full transparency of availability by means of the online portal and app
- Optionally combinable with TopDefense® (DDoS protection solution)
