

# TOPBACKUP FOR MICROSOFT 365

FOR EXCHANGE ONLINE, SHAREPOINT ONLINE, ONEDRIVE FOR BUSINESS & MICROSOFT TEAMS DATA

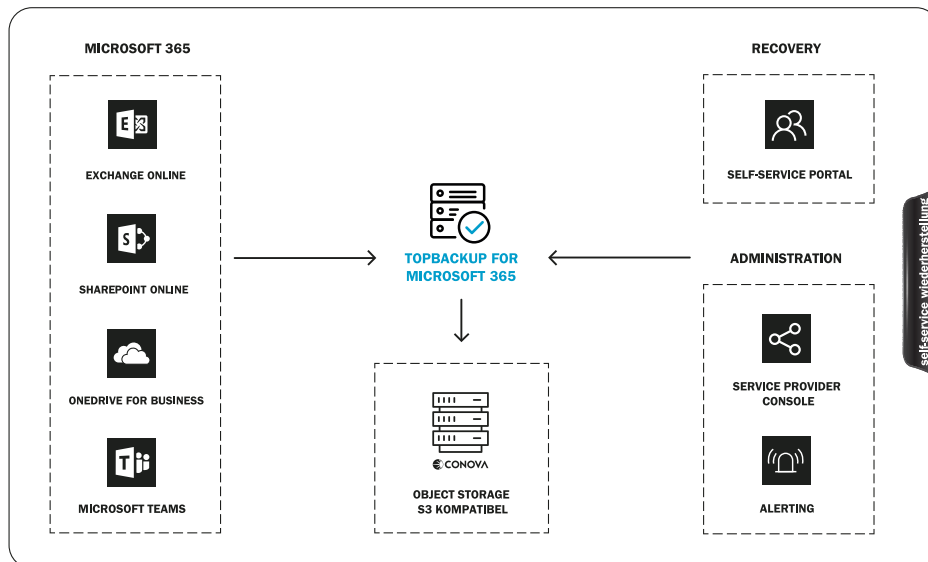

Microsoft 365 offers you powerful services for your digital work, but a complete backup of your Microsoft 365 data is not included. With conova's TopBackup for Microsoft 365, you secure access and control of your Microsoft 365 data on Exchange Online, SharePoint Online, OneDrive for Business and Microsoft Teams <sup>1)</sup>. Our self-service portals enable you to manage your backups independently and flexibly and allow you to restore your data any time. Only conova's TopBackup for Microsoft 365 secures your data in their highly available data centers.

## Highlights at a glance

- Data is secure in the highly available conova data centers
- Objects such as E-mails, files, Teams channel messages and SharePoint items can be restored quickly and easily
- Meet security and compliance requirements by protecting against internal and external threats
- Avoids
  - accidentally deleting important data
  - the incomplete and inaccurate Microsoft 365 storage policies
  - internal and external cyber-attacks that may put your data at risk

With TopBackup for Microsoft 365 you get another software-as-a-service solution from conova. Optionally, unlimited storage space can be used in our highly available data centers.
