

TOPBACKUP PROXMOX BACKUP SERVER

YOUR ENTERPRISE-GRADE OPEN SOURCE BACKUP SOLUTION FOR PROXMOX

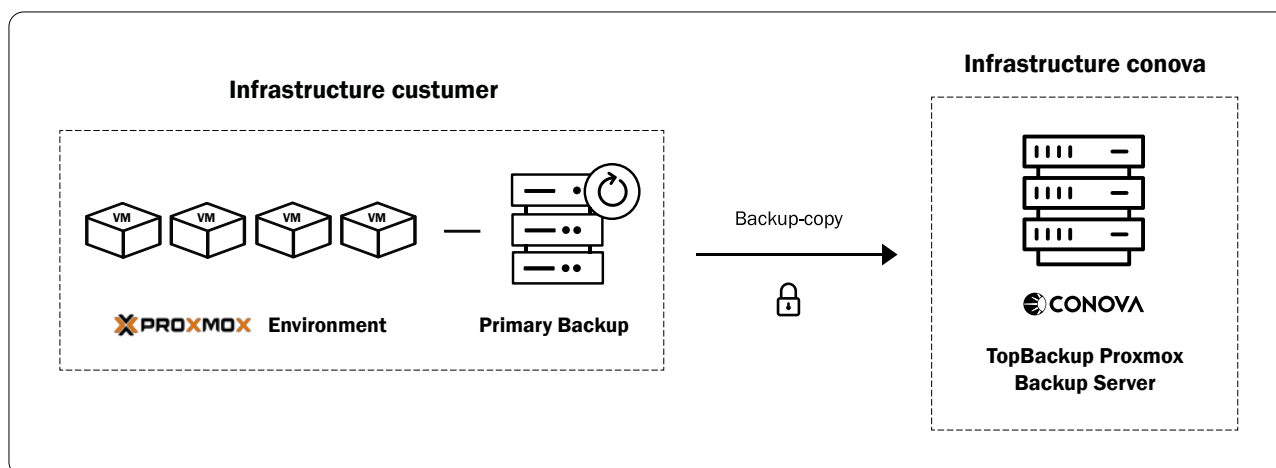

With the TopBackup Proxmox Backup Server, you get a powerful and reliable backup solution for your entire Proxmox environment. The data is stored on a secure, high-availability infrastructure in the conova data centers. This makes this solution particularly attractive as an offsite backup for your on-premises virtualization environment. Thanks to efficient, deduplicated backups, storage space and network resources are used optimally. At the same time, modern encryption and integrity mechanisms ensure maximum data security and protection against data loss.

Highlights at a glance

- Highly available backup infrastructure in EN50600-certified data centers
- Offsite backup in accordance with the proven 3-2-1 backup strategy
- Data storage exclusively in Austria
- Space-efficient data backup
- Fast recovery of virtual machines and data
- End-to-end encrypted data backup
- Easy management via a web-based user interface
- Support from experienced conova specialists

With TopBackup Proxmox Backup Server, in addition to the primary backup at the customer's site, an encrypted backup copy is also transferred to the conova data centers. This approach combines fast on-site recovery times with the security of a geographically separate backup location.

TopBackup Proxmox Backup Server ¹⁾	One-time costs	Price per month
Basic package	upon request	upon request
Backup space 1 TB	-	upon request

¹⁾ SLA Economy included, SLA Business and First Class (24x7) optional. For more information, please refer to the TopSLA datasheet. It is available upon request.

Notes:

- We recommend that you store only encrypted backups when using this backup product. You can ensure this by enabling the corresponding setting in PVE.
- The scope of services includes only offsite backup at the conova data center. Backup at the customer's location is not included.
- Minimum contract period of 36 months.
